PROFILE

Computer Science undergraduate and Software Engineering Intern focused on full-stack development and backend architecture. Proficient in Next.js, Node.js, PostgreSQL, and Azure. Experienced in building scalable SaaS products, architecting real-time WebSocket pipelines, and integrating AI microservices for high-performance applications.

EDUCATION

Amrita Vishwa Vidyapeetham

Kerala, India

Bachelor of Technology, Computer Science and Engineering — CGPA: 7.15

2023 – Present

Coursework: Data Structures, Object Oriented Paradigm, Database Systems, Operating Systems, Computer Networks, Software Engineering & Design Patterns

Resonance

Hyderabad, Telangana

Higher Secondary Education (XII), TSBIE — 94.3 Percentile

2021 – 2023

TSBSE

Nirmal, Telangana

Secondary Education (X) — 10 CGPA

2020

PROFESSIONAL EXPERIENCE

PipeBit

Remote

Software Engineering Intern

May 2026 – Present

- Developed Whatsie, a multi-tenant AI WhatsApp SaaS; consolidated 8 PostgreSQL models into 3 normalized tables via Prisma ORM, eliminating data duplication and optimizing vendor analytics queries.
- Engineered an asynchronous Meta WhatsApp Cloud API webhook gateway processing 2,000+ daily events, routing payloads to a Python FastAPI RAG microservice with sub-second HTTP latency.
- Deployed a custom Node.js and Socket.io server handling 200+ concurrent connections and 5,000+ daily messages, enabling real-time React dashboard synchronization with zero page reloads.

ACM Student Chapter, Amritapuri

Kerala, India

Core Member & Co-Lead

Jun 2024 – Jun 2025

- Co-led ACM Glitch, a game development team, overseeing cross-functional projects across 2D, 3D, and AR domains and organizing workshops, hackathons, and technical sessions for 50+ students.
- Established industry partnerships and secured sponsorships for chapter initiatives, while mentoring 20+ members in game development, problem-solving, and emerging technologies.
- Collaborated with chapter leadership and faculty advisors to organize 3+ technical events and streamline operations, engaging 20+ students and fostering a growth-oriented technical community.

SKILLS

Full Stack Development: JavaScript, React, Next.js, Node.js, Express.js, Flask, REST APIs

Cloud Technologies: Microsoft Azure, GCP, Cloud Deployment, Serverless Architecture

DevOps & Tools: Docker, Kubernetes, Jenkins, Ansible, Git, GitHub, CI/CD Pipelines, Nginx

Databases & Caching: SQL, Redis

Programming Languages: Java, Python, C

Core Concepts: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, System Design

PROJECTS

Fine-Tuning LLaMA 8B for Reliable and Context-Aware Legal AI

[GitHub Link](#)

PyTorch, Transformers, FAISS, LoRA, Unsloth

2025

- Fine-tuned DeepSeek 8B Distilled (LLaMA) on Indian legal corpus (IPC, CrPC, Constitution) via LoRA (PEFT) + Unsloth for domain-specific legal reasoning and Q&A accuracy.
- Implemented RAG pipeline using FAISS vector search + Sentence-BERT embeddings; trained with SFTTrainer, AdamW 8-bit, and gradient checkpointing for memory-efficient LLM fine-tuning.
- Reduced hallucinations by 35% and improved domain inference accuracy on legal benchmarks via PEFT-optimized training on resource-constrained GPU hardware.

LegalLink — Cloud-Native Full-Stack Legal Platform

[GitHub Link](#)

MongoDB, Express.js, React, Node.js, Azure, Docker, Kubernetes, Jenkins, JWT

2025

- Developed a full-stack legal platform with multi-role access (Client, Lawyer, Admin), JWT-based authentication, and role-based access control across all application layers.
- Built and secured REST APIs with lawyer verification workflows and document upload functionality using Multer and MongoDB as the primary data store.
- Containerized the MERN stack using Docker and Kubernetes on Azure, and automated CI/CD pipelines via Jenkins and GitHub Webhooks, reducing deployment time by 85%.

HACKATHONS & ACHIEVEMENTS

- Runner-Up, EvoLUMIN Hackathon (2024): Developed a real-time crop monitoring and yield prediction platform.
- Top 10, BrinHack National Hackathon (2025): Built EcoLink, an AI-powered food donation and route optimization platform.
- Finalist, CMR HACKFEST 3.0 (2025): Developed AeroFlare, a wildfire intelligence platform; ranked Top 20 among 400+ teams.
- Published a research paper on hyperspectral imaging for underwater object detection using YOLOv9t and YOLOv10n models.
- Solved 250+ LeetCode problems across diverse DSA topics, strengthening algorithmic thinking, problem-solving, and coding proficiency.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900) – scored 800+/1000; validated core cloud concepts including Azure compute, networking, storage, security, and cloud service models (IaaS, PaaS, SaaS).
- Google AI Essentials – Issued by Google; demonstrated proficiency in AI fundamentals, prompt engineering, large language models, and responsible AI practices across real-world workflows.
